

Certificate in Artificial Intelligence in Education (AIE)

Accredited by **Baqai Medical University**, provided by **CorTeach**.

About Baqai Medical University

Within certain souls lies a fervent desire to uplift their surroundings.

Dr. F.U. Baqai and Dr. Zahida Baqai epitomize this ethos, driven by their profound commitment to healthcare and societal betterment. In the late sixties, they embarked on a journey, choosing medicine as their medium to serve humanity. With grace and determination, they established a private hospital complex in Nazimabad, marking the inception of a legacy. Today, their noble endeavor continues to inspire, shaping the future of healthcare and social service.

i About the programme

This course is designed to empower teachers with the knowledge and skills to effectively leverage artificial intelligence (AI) technologies to enhance teaching and learning experiences. Through comprehensive modules, participants will gain an understanding of the potential of AI in education and explore its applications across various aspects of teaching, assessment, mentoring, and role modelling.

A multimedia-rich online component is an integral part of the course. Both synchronous and asynchronous learning tools are utilized to teach, collaborate, and support participants during the whole course.

? Who is the programme aimed at?

This program is aimed at all educators who are keen interest in enhancing their skills of teaching and assessment with latest advancements of technology.

Participants on the program will be able to utilise the latest AI innovations to upgrade their teaching and learning skills. They will be able to improve their workload management efficiency and leverage the power of AI for more engaging teaching sessions.

- Three Credit Hour Course
- Level 7 (Masters Level)
- Course Transcript provided

? How will this programme be delivered?

This part-time interactive programme will be provided through a delivery model which blends self-directed learning with tutor-led team based learning.

Throughout the course, students will engage in:

- Fortnightly online synchronous tutorials
- Stimulating weekly activities
- Tutor-moderated discussion forums
- Reflective exercises
- Practical application of teaching and learning in their clinical or academic environment

i Graduates of this programme will:

- Be recognized as exemplary teachers and leaders in AI-driven education.
- Leverage AI to enhance teaching, assessment, and student engagement.
- Gain credibility as mentors in AI integration.
- Advance toward a Diploma in AI, strengthening expertise and career prospects.

What will you study?

FIRST HALF OF CERTIFICATION COURSE	
Module	Learning Objectives
Introduction to AI in Health Professions Education	<ul style="list-style-type: none"> Define Artificial Intelligence (AI) and its applications in health professions education. Identify potential benefits of AI in education, supported by relevant literature.
AI Enhanced Teaching	<ul style="list-style-type: none"> Design AI-enhanced lesson plan for a specific topic. Utilise AI tools to improve their student engagement and in-class response. Leverage AI tools to enhance the quality of their lecture presentation slides.
Intelligent Assessment	<ul style="list-style-type: none"> Use AI tools to efficiently manage assessment workload. Evaluate effectiveness of conducted assessments using AI-insights and metrics. recognize limitations to utility of AI-based assessment tools and determine best practices for incorporating them in their assessment plan.

Course Plan:

- Postgraduate Certificate for **3 months**
- Two sessions** planned every month on alternative Sundays
- Timings are 09:00 - 11:00 am (GMT +5)

Programme Entry Requirements:

Applicants must:

- Have completed their undergraduate education.
- Have an interest or background in education.

Program Costs

Pakistan: PKR. 50,000/-
International: USD 200/-

SECOND HALF OF CERTIFICATION COURSE	
Module	Learning Objectives
Innovations in AI Educational Technology	<ul style="list-style-type: none"> Explore the new trends and tools available for educators that utilise AI. Determine which tools are applicable to their teaching style and academic setting. Experiment with 'out-of-the-box' educational AI tools.
Ethics in Educational AI	<ul style="list-style-type: none"> Identify ethical considerations, including privacy and bias, associated with using AI in education. Explore existing ethical guidelines to use of AI in education. Determine culturally relevant areas of concern in ethics for educational AI use.
Personalised Learning	<ul style="list-style-type: none"> Utilise AI tools to generate personalised learning plan for themselves. Teach their students about generating their own personalised learning plans. Setup personalised learning GPTs to provide a custom learning companion for their students.
