

Certificate in Lifestyle Medicine

Accredited by **Khyber Medical University**, provided by **CorTeach**.

About Khyber Medical University

Khyber Medical University aims to promote professional competence through learning and innovation for providing comprehensive quality health care to the nation.

Khyber Medical University (KMU) is a public research university located in Peshawar, Khyber Pakhtunkhwa, Pakistan. Established in January 2007, the university comprises several constituent colleges and institutes, as well as affiliated undergraduate and postgraduate medical and dental institutions, and various programs in the allied health sciences.

i About the programme

This Certificate Program offers participants the opportunity to increase their diagnostic and treatment skills particular to the needs of children and adolescents. This Certificate Program enhances participants' diagnostic and treatment skills for children and adolescents. It focuses on development, psychiatric disorders, risk factors, symptom identification, family dynamics, and prevention strategies.

A multimedia-rich online component is an integral part of the course. Both synchronous and asynchronous learning tools are utilized to teach, collaborate, and support participants during the whole course.

? Who is the programme aimed at?

This Certificate program is aimed at health Professionals (primary care and specialty physicians e.g., General Practitioners, Psychiatrists, Pediatricians, Psychologists and related mental health practitioners); Psychologists, school teachers and allied health professionals; Medical and Psychology Students.

It may also be of particular interest for Education professionals (Mainstream school teachers, Special school teachers, special needs assistants etc.) currently working with child or adolescent populations, who are looking for an opportunity to enhance their understanding of child mental health issues and interventions.

? How will this programme be delivered?

This part-time interactive programme will be provided through a delivery model which blends self-directed learning with tutor-led team based learning.

Throughout the course, students will engage in:

- Fortnightly online synchronous tutorials
- Stimulating weekly activities
- Tutor-moderated discussion forums
- Reflective exercises
- Practical application of teaching and learning in their clinical or academic environment

i Graduates of this programme will:

- Explain the scientific foundations and principles of lifestyle medicine.
- Apply evidence-based lifestyle interventions in prevention and management of chronic disease.
- Utilize behaviour change strategies and motivational interviewing techniques in patient counselling.
- Develop practical recommendations related to nutrition, exercise, sleep, stress management, and social health.
- Recognize the importance of practitioner health, advocacy, and patient-centred implementation in lifestyle medicine practice.
- Design basic lifestyle medicine care plans suitable for clinical and community settings.

What will you study?

Module	Learning Objectives
Foundations & the Clinical Case for Lifestyle Medicine	<ul style="list-style-type: none"> Define lifestyle medicine and explain the six pillars of lifestyle medicine. Describe the relationship between lifestyle behaviours and major chronic diseases including obesity, diabetes, hypertension, and cardiovascular disease. Explain the evidence supporting lifestyle interventions in prevention, treatment, remission, and reversal of chronic disease. Apply basic principles of health behaviour change and motivational interviewing in lifestyle counselling.
Nutrition and Culinary Lifestyle Medicine	<ul style="list-style-type: none"> Explain the principles of whole-food, plant-predominant nutrition and its role in chronic disease prevention and management. Compare evidence-based dietary approaches including Mediterranean, DASH, and plant-based dietary patterns. Assess common dietary risk factors associated with cardiometabolic disease. Develop culturally appropriate nutrition and meal-planning recommendations for patients.
Physical Activity and Exercise Prescription	<ul style="list-style-type: none"> Describe the physiological and health benefits of physical activity and exercise across the lifespan. Differentiate aerobic, resistance, flexibility, and balance training and their applications in health and disease. Assess physical activity levels and sedentary behaviour using simple clinical tools. Develop safe and individualized exercise prescriptions using the FITT principle for common chronic conditions.
Sleep Health and Substance Use	<ul style="list-style-type: none"> Explain the role of restorative sleep in physical, metabolic, and mental health. Identify common sleep disorders and lifestyle factors that negatively affect sleep quality. Describe the health effects of tobacco, alcohol, and other risky substance exposures. Develop basic sleep hygiene recommendations and substance-reduction or cessation strategies for patients.
Stress Management, Social Connection and Emotional Well-being	<ul style="list-style-type: none"> Explain the relationship between stress, emotional well-being, social connection, and chronic disease. Identify common psychological and social contributors to stress and burnout. Describe evidence-based stress management approaches including mindfulness, resilience, relaxation, and positive psychology strategies. Apply basic counselling and behavioural strategies to support emotional well-being and healthy coping mechanisms.
The Lifestyle Practitioner	<ul style="list-style-type: none"> Conduct a focused lifestyle medicine assessment including lifestyle vital signs and behavioural risk evaluation. Develop patient-centred lifestyle medicine care plans for common chronic diseases. Describe the role of interprofessional collaboration, follow-up, and community support in lifestyle medicine implementation. Reflect on the role of practitioner health, advocacy, professionalism, and leadership in lifestyle medicine practice.
